Mining Suppliers Association of British Columbia

“Building A Better Future For Mining”

900-808 West Hastings St.
Vancouver, BC V6C 2X4

T: 604 681-4321 | F: 604 681-5305

www.miningsuppliersbc.ca

"The MSABC is a vital component of mining in British Columbia. We believe so strongly in the importance of their work and in the value of their collective strength that when it comes to procurement, our first preference is to do business with MSABC member companies."

Russ Hallbauer, President & CEO
Taseko Mines Limited

"Industry Associations like MSABC play a vital role in helping project proponents achieve positive permitting outcomes. Join to be seen by decision makers as a member of your industry. Join to demonstrate how important project approvals are to your business, your employees and your community. Join to create a more powerful voice for mining."

Pierre Lebel, Chairman
Imperial Metals Corporation

"The MSABC members contribute greatly to the BC mining industry. Copper Mountain continues to give preference to MSABC member suppliers on a competitive basis of price and services. Industry associations like the MSABC play an essential role within the mining industry and member companies are our first choice as partners when doing business."

Jim O'Rourke, CEO
Copper Mountain Mining Corporation

"The Mining Suppliers Association of B.C. are steadfast supporters of the B.C. mining industry, a respected voice in local communities and our preferred suppliers."

Bill Fleming, VP Operations and Engineering
Teck Resources, Coal Business Unit

MSABC Mission Statement

The Mining Suppliers Association of B.C. (MSABC) is a non-profit association, affiliated with the Mining Association of British Columbia.

Formed in 1986, it comprises suppliers, contractors and consultants to the BC mining industry who are committed to promoting the sustainability of this valuable resource. Recognizing the importance of mining to the economic well-being of the province, the mission of the association is to promote the development of a sustainable mining industry in BC by **“Building a Better Future for Mining.”**

To achieve this mission, the Association:

1. Is represented on the board of The Mining Association of British Columbia (MABC) and is a full partner in the campaign for positive public awareness of the industry.
2. Offers expertise and active participation in the development of governmental policy affecting the industry.
3. Helps funding activities of the MABC designed to positively encourage public and political support of the industry, including:
 - i. The Mineral Resources Education Program
 - ii. Mining Week – the annual province wide celebration of mining’s contribution to the B.C. economy
 - iii. Mining for Miracles – the industry’s campaign for B.C. Children’s Hospital. As of 2006, the industry has raised approximately \$8 million.
 - iv. Numerous industry events and programs for government representatives, mining engineering students, the general public and our own members.

The future direction of our industry relies on the active involvement of its suppliers, contractors and consultants.

It is the right thing to do.

Message From The MSABC Chair

A Time of Positive Change

Welcome to the 2011 edition of the Mining Suppliers Association of BC's (MSABC) membership directory. Much has changed since our last edition, including our name, yet we remain committed to our founding principle – to support the mining industry in British Columbia.

To this end, we have made some positive changes in recent years. We have become more closely aligned with the Mining Association of BC (MABC) and are now full voting members of that association, and sit on their Executive Committee. With this initiative we have made constructive strides in publicly supporting mining initiatives, increasing membership and developing closer ties with MABC. In turn, MABC members have demonstrated their support for MSABC members through published statements, and are encouraging their procurement team to consider the membership status of its bidders. In short, the synergy that is being created by our two associations is exciting and we look forward to continued growth together.

We have also secured a Director, MSABC Relations, Alec Morrison, to work within MABC for the betterment of both of our associations. It is under his leadership, and working together with Sylvia Gillies and Michelle Donnelly

that this Directory has come together. We appreciate that this Directory will experience ongoing changes, so be sure to check it out online from time to time at www.miningsuppliersbc.ca.

Lastly, through our very successful networking and fundraising events, we have continued to support a number of non-profit & charitable organizations such as the Mineral Resources Education Program of BC and Mining for Miracles. We can all be proud of what we give back to our community through our donations as an Association, and through our individual and company donations. We are making a difference!

Thank you to all of our members for your continued support.

Cheers,

A handwritten signature in blue ink, appearing to read "Patty Moore". The signature is stylized with large, flowing loops and a prominent flourish at the end.

Message From The Chair Of The Mining Association of BC

I would like to congratulate the Mining Suppliers Association on the publication of their 2011 Membership Directory. This will be an excellent tool for mines, industrial mineral producers and smelters to use to find quality supplies and services in BC.

Simply put, mines could not operate without a reliable network of suppliers, contractors and consultants. The companies listed in this directory play an integral role in the mining industry and support the livelihoods of thousands of families. They will be needed as our industry grows in every region of BC.

Once again, congratulations to MSABC for the publication of their 2011, Membership Directory.

Sincerely,

John McManus

Atlantic Industries Limited

Save time and money on mine site infrastructure. Custom, value-engineered solutions from AIL MINING have been supporting many of the world's most successful mine sites for over 40 years.

Applications include:

- heavy haul road and rail arches
- MSE crusher walls and retaining walls
- stockpile, conveyor and escape tunnels
- portals, bridges, drainage and storage structures

By design, our solutions ship and install easily, making them ideal for remote locations. To ensure your project's success, our in-house engineering teams will work with you through the entire project cycle – providing engineering support, interpreting drawings, advising on specifications, and supervising installations.

The West Coast Fishing Club

The West Coast Fishing Club was established 22 years ago, with the premise of offering anglers first class salmon fishing adventures in Pacific North West. With three lodges situated on the most northern tip of the Haida Gwaii (Queen Charlotte Islands), there is no other location on the coast that compares for both pacific salmon fishing and first class accommodations. Anglers from around the world return to the luxurious The Clubhouse, Langara Island every season in search of trophy salmon. The main lodge has 28 appointed guest rooms, private meeting areas, fine dining and outstanding customer service. Expert guides, first-rate boats and tackle, and the sheer abundance of fish virtually assure that you will catch the biggest, as well as the most, salmon of your life. All adventures are fully inclusive from Vancouver. In 2012, look for the opening of West Coast Fishing Club Panama's luxury fishing resort on Isla Del Rey, just a short flight from Panama City. From your first steps on Panama soil, you can be boarding your sleek Strike Yacht and heading out on the water in under an hour, directly to the heart of some of the best fishing in the world.

Western Equipment Ltd.

Western Equipment is a leading supplier of Power Transmission, Logging, Mining, Construction, Safety and Industrial Products. Since Western Equipment's beginnings back in 1947 with a small store in Victoria, change and growth have been the main-stay, and the challenge for this company and it's employees. Currently operating out of six branches in British Columbia, Canada, our company is a major supplier and consultant to this province's resource based industries. We can also boast that no other industrial distributor in BC has the depth and diversity of products to offer their customers. With a full service rigging shop in all branches, we offer custom made wire rope cable and chain assemblies made on site.

Wire Rope Industries

Wire Rope Industries is the most diversified manufacturer of high-performance wire rope products in North America. For over 100 years, the company has been a leader in its field. With our knowledge and expertise, we have been able to refine the art of rope making into a science. Based on the growing and diverse demands of deep shaft underground mining operations, Wire Rope Industries offers Minepro: a full range of specialized mining products and services. Custom designed and tested for superior performance and value, our Minepro line includes high performance products such as Tri-Max FS drum hoisting ropes. Open pit mines are renowned for having some of the most difficult equipment operating conditions found anywhere in the world. Wire Rope Industries also offers a full line of specialized mining cables and wire ropes designed and manufactured to handle the severe and diverse conditions.

District of Chetwynd

District of Chetwynd is located in the Rocky Mountain foothills in northeastern British Columbia. Situated on an ancient floodplain, it is the first town eastbound travellers encounter after emerging from the Rockies along Highway 97 and acts as the gateway to the Peace River Country. Chetwynd is the commercial centre for the rural communities of the Pine River Valley, Moberly Lake, Jackfish Lake, and Lone Prairie. Its primary industries, include forestry (West Fraser Mills, Canadian Forest Industries, Tembec Pulp), natural gas (Spectra Energy, Talisman Energy, ConocoPhillips), wind energy (Dokie Wind, Finavera) and coal mining (Walter Energy)

Norwest Corporation

Norwest Corporation is an international, employee-owned energy, mining and environmental consulting company. Over the past 25 years, we have grown to offer a wide range of services to the energy, minerals and natural resource industries. These include geological engineering and consulting for the evaluation and development of coal, industrial minerals and base and precious metals projects. Norwest brings an integrated approach to environmental assessment and regulatory support. Our engineering expertise comes into play through initial feasibility study, operational monitoring, reclamation and environmental remediation. Norwest's management consulting services build on its extensive experience in management, operations, planning, analysis, marketing, and government relations. These enable Norwest to provide a full range of due diligence services, including bankable feasibility studies.

Town of Port McNeill

Port McNeill is a town in the North Island region of Vancouver Island, B.C. with a population of 2,623 (2006). Located on Vancouver Island's north-east shore on Queen Charlotte Strait, it was originally a base camp for loggers, Port McNeill became a settlement in 1936. The town was named after Captain William Henry McNeill of the Hudson's Bay Company. February 2007 marked the opening day of Orca Sand & Gravel LP, the largest sand and gravel quarry in the northern hemisphere. Material is shipped via 70,000 tonne container ships to ports in California and Hawaii and via 7000 tonne barges to Vancouver.
